

# Advancing Regenerative Farming Practices in North & South Eastern Wisconsin

*Conservation That Works!*

March 2022

Glacierland RC&D has trained, professional resource conservationists that *offer guidance to farmers* to apply sustainable farming practices best suited *for their unique operation*.

**Offering Assistance in:**

**Managed  
Rotational  
Grazing**

**Regenerative  
Farming**

**Financial  
Assistance**

**Peer  
Networking**

## **Background:**

Glacierland RC&D is a non-profit organization with a mission to support rural conservation. We partner with federal, state, local and other non-profit organizations to conduct educational outreach and provide on farm technical assistance to producers.

We offer specialized services in livestock grazing and technical assistance for soil health practices including cover crops and no-till practices. Our primary goal is to encourage more farm producers to adopt managed-rotational grazing - A sustainable farming practice with many environmental and economic benefits.

# How our Process Works

- 1 You contact our team looking for direction to improve your farm
- 2 We come to your farm, evaluate your site and discuss your goals

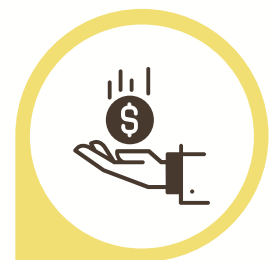

- 3 We take an inventory and come up with a plan that addresses your resource concerns

- 4 We finalize a plan and discuss cost share opportunities

- 5 We guide you through the financial assistance process

- 6 You establish pastures, build fence and start grazing!

- 7 Our team offers regular follow up to ensure you are successful!

**Where we Work**

We offer services to all counties in green with a targeted focus in the area in yellow.
